

LEHIGH VALLEY PLASTICS

We Shape The Industry

Agriculture

We produce a wide variety of products for the Agricultural industry, with end uses on harvesters, combines, field transportation and support equipment. These products reduce wear, provide greater impact and abrasion resistance, reduce operating noise and allow machinery to cycle more quickly with less or no need for external lubrication. In many applications, UV-stabilized plastic materials can help significantly extend the product life by combating degradation due to exposure in outdoor environments.

Here are some of the current Agricultural applications we are providing our customers:

- ◆ Chute / Conveyor Liners
- ◆ Skid Shoes
- ◆ Drop Trays
- ◆ Augers / Sprockets
- ◆ Seed Plates
- ◆ Tubing Assemblies
- ◆ Gears
- ◆ Idler Blocks
- ◆ Bushing / Bearings / Washers
