

LEHIGH VALLEY PLASTICS

We Shape The Industry

Electronics

Plastics continue to expand into the Electronics market, from the traditional phenolic materials used as insulators and circuit boards to the high performance materials of today. We now have materials such as PEEK, Torlon® and Celazole® which can be used as electrical housings, isolators and connectors due to their high temperature resistance and insulating characteristics. Today's new plastic materials have: Dimensional stability at elevated temperatures, low off-gassing, high purity properties, and excellent chemical resistance.

Here are some of the Electronics applications we provide our customers:

- ◆ Electrical Connectors
- ◆ Seals
- ◆ Electrical Housings
- ◆ Terminal Boards
- ◆ Insulators
- ◆ Bushings
- ◆ Spacers
- ◆ Card Guides
- ◆ Clamps
- ◆ Test Fixtures
